P. Sakis Meliopoulos Fri, 18 Jan 2019 10:45:00 GMT Basics of Power System Control and Protection - The engineering design process is a methodical series of steps that engineers use in creating functional products and processes. The process is highly iterative - parts of the process often need to be repeated many times before another can be entered - though the part(s) that get iterated and the number of such cycles in any given project may vary. ...
